**SOURCE**

1. An agricultural collective has been established in Znojmo. This collective is of the fourth grade, which means that the farmers had to give up all their property to the collective. The farmers receive compensation in kind, that is, cereals and potatoes. This allocation is restricted by the present ration cards, and thus, farmers do not get more than other people. In addition, they receive 800 to 1200 kes in checks.
2. Members of the collective are supposed to receive the net profit at the end of each commercial year. So far, there has been no profit. The collective farms incurred debts of several million kes during the year 1950-51. This amount was made up by a loan from the government.
